RE: WEHR Project- Nantucket

Dear Mr. Guthrie;

I would like to take this opportunity to express my sincere appreciation to you and your team of professionals for your concerted efforts to make the WEHR project a success. Everyone who sees the completed project raves about the craftsmanship and the beauty of the six new structures. I agree that your finished product is commendable, but my true appreciation for your efforts runs a bit deeper.

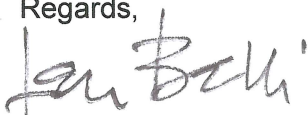

I would like to thank your site supervision for their professional control and handling of materials that were specified from all over the globe; and for managing subcontractor performance that constantly corrected issues presented by the design drawings that could have ended in schedule disaster but did not. Your team was always focused on the final goal of schedule attainment and cost control and for that I am grateful.

I would also like to thank you and Daryl Carter for your assistance during the Value Engineering efforts and for taking an active role in making cost saving design suggestions throughout the project resulting in \$2M+ in cost avoidance. Your professional input during the structural modifications for three of the buildings was tantamount to recapturing the schedule and your innovative suggestions saved not only the schedule but many man-hours.

And, least I forget, this all took place 30 miles offshore. It was a pleasure working with the SCG team on such a complex and challenging project and I look forward to our next assignment together.

Wishing you and your team all the best in future endeavors.

Regards,

Leonard P. Belli  
Vice President  
LPB/al
